

LILY Under Water Chest Drainage System

✓ Safety ✓ Simple ✓ Friendly

GMP, ISO 13485, ISO 14001, ISO 45001, ISO 17025 Certifications

LILY MEDICAL

Indications

The underwater chest drainage bottle is designed to create the water seal which permits drainage of air and fluid from the pleural space but does not allow air to reenter the chest. The bottle can be used as single collection bottle with water seal or can be use at two-bottle or three-bottle system as water seal bottle.

Features

- The bottle is transparent and durable, with clear capacity markings for easy recording and observation.
- The liquid container features accurate and clear graduation marks, with values that are easy to read.
 - 2.1. A horizontal line at the 300cc mark indicates the "UNDERWATER SEAL LINE".
 - 2.2. A line at the 1,500cc mark indicates "DO NOT FILL ABOVE THIS LINE".
- The water seal tube is located 2.5-3 cm below the 300cc marked line.
- Equipped with a check valve to effectively prevent backflow of waste liquid.
- Available in 1800ml capacities / with check valve / filter / water seal tube / white cap / sterile packaging.
